Assignment and Release

I hereby authorize my insurance benefits to be paid directly to the doctor. As the patient, parent, or legal guardian signed below, I understand that I will be receiving a bill for the services incurred today until I can provide accurate insurance information including the insurance name, policy number, policy subscriber information, and effective date of my coverage, along with a copy of my insurance card. Furthermore, I do assume responsibility for full payment pending any remaining balances not covered by insurance.

Do you dislike dilating eye drops?

Clarity Eye Care has been proud to be the first in Ithaca to offer routine wide-field digital retinal screening using an instrument called the **opto**map®. This instrument captures a specialized digital image of the back of your eye in a few moments and allows your doctor to view a 200-degree panorama of your retina in the examination room. It is quick, requires no drops, and is as painless as having your picture taken. Best of all, you will be able to get back to your busy life without blurred vision or light sensitivity—the most common side-effects of traditional dilation drops.

Our doctors recommend that both children and adults make the **opto**map® part of their annual eye health examination. Though insurance will not cover this advanced screening, our fee for the **opto**map® is only $39, due at the time of service. Our patients agree that it is worth the investment in their eye health.

☐ I **elect** to have an **opto**map® exam today. ☐ I **decline** the **opto**map® and would prefer dilation.
